PROFILE SUMMARY

Highly motivated web development and design intern with hands-on experience in HTML, CSS, and JavaScript, specializing in building user-friendly web applications. Proven track record in completing projects efficiently, with a strong focus on quality and innovation.

SKILLS

HTML | CSS | Java Script | MYSQL | MS Excel | Bootstrap

PROJECTS

Academic Projects

- **Smart Laser Engraver** - Developed a smart laser engraver using Arduino Uno, motor drivers, PCB, and Python-based software to precisely engrave designs on wood, with laser movements controlled by CD drive motors.

- **Smart line follower car -** Developed a smart line follower car using Arduino Uno, motor driver, and essential components to autonomously navigate a predefined path.

- **Basic Calculator using Digilent Basys 3 Artix-7 Fpga Trainer Board.**

Other Projects

- **Basic Login Authentication** - A basic login authentication with HTML, CSS, and JS involves creating a styled form and validating input against predefined values.
  View Project

- **Basic Calculator -** Created a fully functional Calculator with a user-friendly interface. It can handle basic arithmetic operations and is designed for a seamless user experience.
  View Project

- **Brand Website -** Explore the vibrant world of Balaji Wafers through a dynamic and user-friendly website, crafted with HTML, CSS, and JavaScript, and proudly hosted on GitHub. This project was created as a practice exercise and is intended purely as a trial, **not for commercial use**.
